À PROPOS

Data Analyst with a strong product mindset and a technical background as a former developer. Leveraging a dual specialization in Data Analytics and Product Management, I combine quantitative analysis (SQL, Python) with product vision to translate raw data into actionable insights. My goal is to drive decision-making (Roadmap, A/B Testing) and optimize user experience through data.

COMPÉTENCES

- **Langages** : SQL (Modeling & Optimization), Python (Pandas, Polars, NumPy), Go.
- **Data Stack & Cloud** : Google Cloud Platform (BigQuery, Vertex AI, Storage), Snowflake, PostgreSQL, MongoDB, Docker, DataBricks.
- **Analytics Engineering** : dbt (Modeling, Tests, Documentation), Data Transformations, Airflow/FiveTrans(notions),Airbyte.
- **Product Analytics**: Amplitude, GA4, Posthog, Product Management
- **Visualization** : Tableau, Looker Studio, Google Apps Script.
- **Languages** : English, French

EXPÉRIENCES PROFESSIONNELLES

Talent Acquisition Partner – AVIV Group

Janvier 2022 – Octobre 2025

- **Data Driven Recruiting**: Developed visualization dashboards via Looker Studio and Google Sheets to track and improve recruitment KPIs.
- **Process Optimization**: Analyzed historical hiring data to reduce Time-to-Hire and improve conversion rates.
- **Market Intelligence**: Conducted salary benchmarking for the Product & Data division to align compensation strategies with the market.
- **Stakeholder Management**: Successfully recruited 45 strategic profiles (Product Managers, Data Analysts) in 2024, requiring deep understanding of technical stacks and business needs.

Développeur Go – Molotov TV

Septembre 2021 – Janvier 2022

- **API & Data**: Enhanced the Subscription/Paid Offer API using Go and Elastic Search.
- **Database Management**: Managed and updated data structures via MongoDB.
- **Optimization**: Refactored code to support seasonal marketing campaigns (Halloween Offer)

Développeur Go – Azfalte

Juin 2021 – Septembre 2021

- **Database Design**: Designed and created the relational database using PostgreSQL.
- **Backend**: Implemented multiple API endpoints for bicycle inventory cataloging.

FORMATION & CERTIFICATIONS

Wild Code School

Paris
Mars 2025– Août 2025
Data Analytics

Maestro

Paris
Novembre 2023 – Février 2024
Product Management

Databird

Paris
April 2026 – June 2026
Analytics Engineering

Google Data Analytics Certification

ECOFLUX | Environmental Analytics & ML Platform

Stack: Airbyte, Python (Polars, Scikit-Learn), SQL, BigQuery, dbt, Amplitude, Looker Studio.

Key Achievement: Engineered and modeled a BigQuery data warehouse using dbt (Star Schema) to transform 90k+ raw events into actionable performance indicators (KPIs).

PROJETS

RAILFLOW | Analyse de Produit

- **Analyse**: Identify high-volume routes with significant drop-off rates and predict individual booking probability
- **Insights**: Implement a smart discount engine that triggers a targeted 5% incentive specifically for "Medium Intent" users to boost conversion without eroding margin.

MEDITRACK | Product Analytics

- **Analysis**: Identify where users are dropping off and why they aren't returning
- **Insights** : Implemented a push notification for new users
